

## Environmental Hazard-Camp Lejeune (EHCL) Facts

\*Data Through January 11, 2011 through April 30, 2015

UNIQUE VETERANS APPLIED FOR EHCL ISSUE	NUMBER OF GRANTS	NUMBER OF DENIALS
10,569	795	9,834

\*Veterans may file claims for more than one issue; thus, the unique veteran count does not equal the sum of issues decided.

\*Data Through January 11, 2011 through April 30, 2015

Environmental Hazard Camp Lejeune (EHCL) SUMMARY	Totals
Total EHCL Veterans Served	10,569
Total Active Awards By EHCL Veteran (Included IU counts)	6,369
**% of EHCL Veterans Receiving Benefits	60.3%
Total Veterans Not Receiving Benefits	4,200
% of EHCL Veterans Not Receiving Benefits	39.7%
Total Active IU Awards By EHCL Veteran	480
% of EHCL Veterans with IU	7.5%
Total Pending EHCL Claims	3,814
Total Completed EHCL Claims	14,101

\*\*\*This metric represents Veterans receiving a benefits who claimed an EHCL issue that could have been denied or granted and is receiving benefits either SC percentage rating or DIC/Pension for an EHCL issue or other non-related EHCL issue

\*\*\*This metric is total number of claims related to EHCL. It will not match the veteran count due to one veteran can claim multiple claims throughout his/her lifetime. The Veteran count is a unique count by Veteran

\*Data Through January 11, 2011 through April 30, 2015

MISC GRANT OR DENIAL ID	BENEFIT TYPE	COUNT BY VETERAN
ALL EHCL ISSUES DENIED	ACTIVE PENSION/DIC	625
AT LEAST 1 EHCL ISSUE GRANTED	ACTIVE PENSION/DIC	74
ALL EHCL ISSUES DENIED	OTHER	3
<b>TOTAL ACTIVE AWARD</b>		<b>702</b>

<b>Analysis of Claims Folder Information by Category of Disease By Issue: *Data Through January 11, 2011 through April 30, 2015</b>

	<b>Total all claimed conditions</b>	<b>25,170</b>	<b>1,254</b>	<b>5.0%</b>	<b>23,916</b>	<b>95.0%</b>

\*This above counts are by issue and not by veteran in the previous report found in this report.

[\[1\] Only angiosarcoma of the liver is strongly associated with any of the contaminants at Camp Lejeune \(vinyl chloride\). Hepatocellular carcinoma is the result of infection with Hepatitis B or C.](#)

[\[2\] Acute Myelogenous \(non-lymphocytic\) Leukemia is causally associated with exposure to Benzene. All other leukemias/lymphomas are only weakly associated with any of the contaminants.](#)

[\[3\] Lung Cancer is primarily caused by exposure to cigarette smoke. In the presence of exposure to cigarette smoke over many years, the exposure to contaminants in the water would likely not outweigh the risk from smoking. This is also true, to a lesser extent, for bladder cancer.](#)
